Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Acknowledgment is made in the receipt of the amendment filed August 31, 2005. The amendment has been approved for entry.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 2 and 4-6 are rejected under 35 U.S.C. 102(e) as being anticipated by US 2005/0126864 A1 to Boisseau.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Re-claims 1, 4 and 5, Boisseau discloses a disk brake with mechanical self-boosting, comprising: a brake bracket (interpreted as the yoke 10), a floating caliper 14, a caliper guide (interpreted as guide pins 5), an actuating unit (both hydraulic and electric, see paragraph 58 and paragraph 135) with a friction brake lining 8 is pressed against a brake disc 2, a self boosting mechanism 22, the self boosting mechanism comprises a ramp mechanism having one brace 28

Art Unit: 3683

in a circumferential direction to the brake disc on the brake bracket and another brace 26 transverse to the brake disc on the caliper, when the disc brake is actuated, a braking force is exerted in the circumferential direction to the brake disc on the friction brake lining by the rotating brake disc is transmitted to the brake bracket and not transmitted to the caliper guide, see paragraph 72. As best understood by the examiner the yoke or brake bracket takes up the force exerted in the circumferential direction.

Re-claim 2, the self-boosting mechanism is received displaceably in the caliper.

Re-claim 6, the actuating unit is mounted in the caliper 14.

Conclusion

4. Any inquiries concerning this communication or earlier communications from the examiner should be directed to Thomas Williams whose telephone number is 571-272-7128.
